

effects of the bombing, including radiation sickness, became more widely known in the UK, politicians, philosophers, scientists and church leaders came together to campaign against nuclear weapons with peaceful protests, marches, music and artwork among the responses.

Project volunteers will look into the way the bombing and the aftermath were reported, how the families of soldiers, sailors and airmen who had been serving in the Pacific, or had been held in Japanese prisoner of war camps, reacted and what stories the earliest peace protestors have to tell.

The resulting archive of memories and documents will be publicly accessible through a new website and made available to the Hiroshima Peace Museum.

Sue Bowers, Head of Heritage Lottery Fund London, said: "The reaction of Londoners to one of the defining moments in 20th-century world history is an important subject for study and dissemination to a wider audience as we approach the 70th anniversary of this event."

Jonathan Petherbridge, Creative Director of London Bubble, said: "We are very proud that our work on the Grandchildren of the Blitz project, supported by HLF, has now led to an exploration to the responses to the dropping of the first atomic bomb on Hiroshima, and the production of what we hope will be linked events in London and Hiroshima. The support of the HLF over the last four years has allowed us to develop our skills and thinking as researchers and creative explorers of heritage. In turn this has led to shared knowledge, increased community engagements plus two significant theatre pieces, and now the opportunity to test our ideas on a event of international significance. We are excited and trepidatious in equal measure!"
